

Puzzle

by John de Cuevas

Instructions: Guess the words defined by the cryptic clues (words vary in length from four to nine letters and include two proper names and one hyphenated word), then enter them in the grid one after another in the same order as their clues, starting in the upper left corner. Across words that don't end at the right margin continue on the next line, and down words that don't end at the bottom margin continue in the next column. Eleven across words and ten down words won't fit in the grid unless one of their letters is removed. Those twenty-one letters, taken in order, spell three words inscribed on a well-known Harvard building.
