

# Puzzle

*by John de Cuevas*

**Instructions:** Guess the words defined by the cryptic clues (words vary in length from four to eight letters), then enter them in the grid one after another in the same order as their clues, starting in the upper left corner. Across words that don't end at the right margin continue on the next line, and down words that don't end at the bottom margin continue in the next column. The first down word is a clue of sorts to the two words (not defined below and one of them missing a letter) that belong in the shaded column.
