

## Puzzle # 50 – July 2005 "A Celebration of Sorts"

**Instructions:** This puzzle calls for a non-standard grid that contains 120 cells. You must determine its shape and, as usual, guess the words defined by the cryptic clues (words vary in length from four to nine letters), then enter them in the grid one after another in the same order as their clues, starting in the upper left corner. Across words that don't end at the right margin continue on the next line, and down words that don't end at the bottom margin continue in the next column. Six across words and five down words won't fit in the grid unless one of their letters is removed. Those eleven letters taken in order spell a celebratory (sort of) two-word phrase. As always, I am grateful to Kevin Wald for help with the clues.

The grid for this puzzle is not supplied. You must come up with it on your own, but a large grid that you can use as a working tool is supplied on the next page.
